**User Test Summary – plane animations for Belco Allience website**

We conducted user -test with three teachers about the plane animation by showing them Figma prototype of both of the version of the plane animation.Version 1- plane flying through screen when cardbox is clicked. Version 2- plane peeling the page and showing the new page:

**Teacher 1:**

- Found the plane animation excessive, distracting , time-consuming and unnecessary.

**Teacher 2:**

- Liked Version 1 better

- Said the animation becomes distracting and annoying for the user if it appears on every page

- Suggested the animation should only play once, ideally when entering the Partners section

- Suggested speeding up the animation to avoid unnecessary delays

**Teacher 3:**

- Prefers Version 1

- Found the animation visually interesting

- Suggested changing plane direction to left-to-right for better flow

- Recommended adding clouds moving in the opposite direction to create dynamic sence of movement

- Also agreed animation should not repeat in every partner container but to be played once instead

**Changes Based on the user-test:**

- The animation now plays only onc**e**, when the exchange modules page is first loaded

- Animation speed was increased to reduce wait time and keep the flow smooth

  Reversed the plane direction to move left-to-right

- Clouds were added moving in the opposite direction for dynamic visual contrast and more realistic feel

**Final Feedback:**

After the implemented changes the animation was showed to a teacher and was approved.

# USER-TESTING QUESTIONS

**Plane Animation (Partner Section)**

➤ **Click on a partner container and observe what happens.**

- **Did the plane animation appear?**

- **Was it surprising, fun, confusing, or unnecessary?**

- **Did the animation help you understand something (like travel, partnerships, movement)?**

**Overall Animation Feel**

➤ **Do the animations add to the experience or make things feel busy?**

- **Would you keep them, change them, or remove them?**

**Which of the plane animations you like more?**

**a) Version 1**

**b) Version 2**

**Wrap-Up Task**

**How smooth did the experience feel from start to finish?**

➤ **Think about moving between pages and understanding content.**

**. Would you trust this site for real exchange opportunities?**

➤ **Why or why not?**

**Final thoughts – what stood out most?**

➤ **Cool visuals? Easy use? Something frustrating?**
